Subject Index

Acidosis

in gastroenteritis 155
 in prematures 531

Addison's disease 197

Alkalosis, congenital 188

Allergology 474

Bacteriology

enteropathogenic *escherichia coli*, diarrhoea due to 432

respiratory illness, etiologic study 336

toxoplasmosis, frequency of positive dye test 81

urinary tract infection, *coli* antibody titer 247

Blood

A antigen, quantitative variation of at birth 550

acute leukaemia following smallpox vaccination 383

blood volume of newborn prematures 419
 erythrocyte, glucose-6-phosphate dehydrogenase deficiency of 319

fibrinolytic activity, thrombin inhibitor and kinetics of clot in respiratory distress syndrome 587

fibrin-stabilizing factor 193

glucose in blood, plasma and erythrocytes in newborns, evaluation of methods 3
 haemolysis in blood samples 325

haemoglobin M_{Arhus} 357, 363

hemolytic anemias, erythrocyte cholinesterase activity in 218 leucine aminopeptidase in serum 578

leucopenia, neonatal due to fetomaternal leucocyte incompatibility 86

red blood picture during first years of life 69

thrombocytopenia after rubella 97

 - rickets in premature infants 192

EDITORIAL

Acta Pædiatrica Changes its Name

When I. Jundell in 1921 started this pediatric journal and coined the name *Acta Pædiatrica*, there were no other periodicals with this name and therefore no risk of confusion with other journals. The title *Acta Pædiatrica* has apparently been very attractive, since quite a number of pediatric journals which have appeared later on have adopted the same name, as a rule with an addendum indicating the country of origin. Sometimes this name of origin of the journal has been omitted in references, thus causing a risk of confusion with our *Acta Pædiatrica*. In order to avoid this possibility of error we started to use the same principles as *Index Medicus* in its references, giving in brackets the name of city from where *Acta Pædiatrica* is distributed (*Acta Pædiatrica (Stockholm)*). This, however, removed somewhat of the Scandinavian character of the journal and made it look like a purely Swedish pediatric periodical. Following a proposal by colleagues in other Scandinavian countries, the Board of *Acta Pædiatrica* therefore at last decided to add *Scandinavica* to the old name, thus following the pattern of a number of other Scandinavian medical journals. Our pediatric periodical has therefore from this issue on got its name changed to

Acta Pædiatrica Scandinavica

This change of name does not imply any change of the editorial policy of the journal, which remains the same. The
